

Specifications

Feature	Cost Control	Secure Pro	Description
Pull printing	X	✓	Securely print prescriptions or patient details for the right staff member.
Print cost charging	✓	✓	Powerful tracking tools to check usage and facilitate charging print costs back to a user, department or other cost centre.
Reporting	✓	✓	Accurate reporting provides knowledge and control over printing resources.
Print quotas	✓	✓	Limit how much a user can print in a specified period of time. Groups of different users can be assigned different amounts.
Scheduled email reports	✓	✓	Built-in and customised reports can be run automatically to help optimise work-flow.
Database Integration	✓	✓	Automatically create and link different users that have printed with Active Directory and other databases.
Supports Windows, Mac and Linux clients	✓	✓	Flexible Windows-based printing software that allows users to print on Mac and Linux.
Web based administration	✓	✓	Capture all print job information on a secure server, and allow administrators to manage and control this data through an integrated user interface.
End user web tools	✓	✓	Users can log onto the server to view their printing history.
Scripting	✓	✓	This feature allows an Administrator to create and run scripts to fit their unique requirements.
Brother Solutions Interface (BSI) Integration	X	✓	BSI machines offer advanced features that can help improve security, productivity, and save money.
Mail2Print	X	✓	Allows medical staff to easily enable, monitor and control printing from mobile devices such as smartphones and tablets.
Secure function lock	X	✓	Enables lockout of some or all printing functions to improve device security and prevent printing misuse.
ScanDirect	X	✓	Allows the user to scan directly to their email address from any BSI-enabled machine.

 PrintSmart

CostControl 

SecurePro 

The perfect cure for printing headaches

PrintSmart Cost Control provides medical organisations with complete visibility over 'what, when, and how much' each staff member prints – providing greater control over printing expenditure.

A simple user interface delivers greater insight into print usage – enabling IT to gain easy print management, tracking and control to reduce print costs and optimise operational efficiency.

How PrintSmart Cost Control and Secure Pro benefit healthcare establishments

PrintSmart Secure Pro is designed to be seamlessly integrated into your existing IT infrastructure, enabling medical staff to significantly increase print security whilst reducing printing costs.

The pull printing* feature also adds another layer of security by only allowing the release of a print job from a chosen printer after authentication via PIN code or ID card. This is critical in regards to maintaining patient confidentiality and issuance of prescriptions.

Hospital

Pull printing* allows the doctor or nurse to release their print job from any chosen device by entering a print code at the control panel or swiping an ID card on an attached reader. This provides enhanced security as confidential patient protected information (PHI) can only be accessed by the sender.

MFC-8950DW
mono multifunction printer
Duplex, Fax, Scan & Print capabilities.

IT Support

Accounting reports help show how much medical staff are printing and how often they print – helping to identify usage patterns of printers and determine which types of devices are needed and where, in order to cut costs.

Pharmacy

Setting printing resource budgets and customised reports for each pharmacy outlet can help deliver visibility and tighter control of costs.

mono printer
Volume 'Repeat prescription'
printing.

Ward Round

Doctors and nurses are able to send multiple print jobs from a tablet whilst on their ward round and access them up from any printer in the hospital at any time.

Doctors Surgery

A surgery dealing with confidential patient records can disable the scan-to-USB or scan-to-fax function to avoid sensitive documents being taken out of the business.

Who benefits from PrintSmart Cost Control and Secure Pro

Doctor

"Regardless of where I am in the hospital I can now send a print job from my tablet and go to the nearest printer to access it with my ID card. I no longer have to waste time walking to my office printer and I know that whatever information I send to the printer can only be accessed by myself."

IT Manager

"I have set up a weekly customised report that monitors the printing patterns of each department. This enabled me to shift under-used printers to help share workloads and reduce the printing usage and associated costs."

Senior Nurse

"Thanks to the secure function lock feature I no longer have to worry about faxes ending up in the wrong hands. This means that confidential patient data can only be accessed and processed by myself."

Hospital Manager

"Our confidential data could have been accidentally or intentionally accessed by unauthorised users before. Now, we have strengthened our commitment to patients and customers to protect their personal information."
